Be careful not to confuse the brandies and liqueurs. Indeed, they are not a simple distillation product, they still have three basic elements:

Alcohol: It helps to preserve the product and release perfume

Sugar: Sugar liqueurs must contain at least 100 g per liter.

Creams must contain 250g / sugar / l minimum

Aromas: The preparations are made by steeping or brewing an aromatic substance (roots, bark, grass, leaves, flowers, fruits, seeds)

Rum is a distilled alcoholic beverage made from sugarcane by products, such as molasses, or directly from sugar cane juice, by a process of fermentation and distillation. The distillate, a clear liquid, is then usually aged in oak barrels. Formerly called " guildive " English "kill the devil " or " rum " which means kills the demon. The word rum would come from an old English word " rubillion " meaning din and uproar.
